The birth of Isaac was promised (see Genesis 17:19, 21) to Abraham and his wife Sarah, after a long and childless marriage, as a sign that the blessings originally bestowed by God upon Abraham would be continued in Isaac, heir of the Covenant. The events of Isaac's life are recounted in Genesis 21-28.

The dominant story in the narrative, and one of the most widely known stories in the Bible, is that of the projected sacrifice of Isaac (see Genesis 22). According to this account, God tested Abraham's faith by asking him to sacrifice his beloved son. At the last moment, after God was convinced of the perfect obedience of both father and son, he accepted a ram as a substitute for the youth. This story is thought to express the Hebrew rejection of human sacrifice, practiced by surrounding nations. The ram is recalled today in synagogue ritual at the solemn blowing of the shofar, or ram's horn, during the Jewish High Holy Days, Rosh Hashanah and Yom Kippur.

## Generation 2 (cont.)

The New Testament alludes to Isaac as a precursor of Christ and of the church (see Galatians 3:16, 4:21-31), and the obedience to his father to the extent of self-sacrifice is associated with that of Christ (see Hebrews 11:17-19).

These themes were developed by several of the patristic writers, and Isaac appears often in Christian art, particularly in association with the Eucharist.

Archaeologists and biblical scholars have drawn parallels between the biblical narrative of Isaac and the history of the Semitic tribes. Abraham is thought to represent the nomadic stock out of which the Hebrew and Edomite tribes separated. Isaac is believed to represent the tribes that joined to form the Hebrew confederacy and to give allegiance to the God, Yahweh, or Jehovah, originally a tribal deity; and Ishmael is believed to represent the tribes of Edom. Isaac was a relatively minor figure compared to the other two great biblical patriarchs, Abraham, his father, and Jacob, his son; but a number of the details of the biblical account are believed by scholars to have major symbolic importance.

The story of his birth is believed to be a deliberate attempt by early Hebrew writers to alter the traditions of the Semitic tribes in order to strengthen adherence to the Hebrew confederacy, a military and political alliance, by suggesting that it had divine inspiration. In making Isaac the legitimate son, and Ishmael the illegitimate son, of their common ancestor, the Hebrews claimed superiority over the independent Edomite tribes.

Finally, the rivalry between Isaac's two sons is thought to reflect again the rivalry between Edom and the Hebrews.

#### **Judah (Bible)**

From Wikipedia, the free encyclopedia

This article is about the son of Jacob. For the tribe, see Tribe of Judah. For the kingdom, see Kingdom of Judah.

Tomb attributed to Judah in Yehud, IsraelJudah/Yehuda (Hebrew: ?????????, Standard Y?huda Tiberian Y?hû?ah) was, according to the Book of Genesis, the fourth son of Jacob and Leah, and the founder of the Israelite Tribe of Judah; however some Biblical scholars view this as postdiction, an eponymous metaphor providing an aetiology of the connectedness of the tribe to others in the Israelite confederation.[1] With Leah as a matriarch, Biblical scholars think the text's authors believed the tribe was part of the original Israelite confederation; however, it is worthy of note[2] that the tribe of Judah was not purely Israelite, but contained a large admixture of non-Israelites, with a number of Kenizzite groups, the Jerahmeelites, and the Kenites, merging into the tribe at various points.[3]

---

## Generation 4 (cont.)

The text of the Torah argues that the name of Judah, meaning to praise, refers to Leah's intent to praise Yahweh, on account of having achieved four children, and derived from oded, meaning I will give praise. In classical rabbinical literature, the name is interpreted as just being a combination of Yahweh and a dalet (the letter d); in Gematria, the dalet has the numerical value 4, which these rabbinical sources argue refers to Judah being Jacob's fourth son.[4]

When Reuben lost his firstborn right ( kingship, priesthood, and the double-portion), Joseph inherited firstborn rights instead.[5]

Judah Judas ibn JACOB and Tamar had the following children:

### THE TROJANS AND WESTERN EUROPE

The story of the famous Trojan Kings-once so widely discussed in Greek literature-is little known to History students today. It begins in the days of Jasius, or Jason, who became King of Celtica in 1601 BC, the half-brother of Jasius is Dardanus, whom Josephus declares to be Darda or Dara. (See II Chronicles 2:6). Darda was of the House of Judah and the Trojan Kings therefore were Jews!

Following a quarrel Dardanus fled to Asia Minor, married the daughter of a native King, and founded the vital fort of Troy. Thus the Trojan line of Kings-to be discussed in detail in Volume II of the Compendium-were able to dominate Western Asia Minor. The Trojans were generally supported by the Assyrians in all their wars against the Greeks. The line of Trojan Kings may be found on page 12 of Enderbie's "Cambria Triumphans, or Brittain in its Perfect Lustre."

### **Erichthonius of Dardania**

The mythical King Erichthonius of Dardania and Batia (died c. 1368 BC) was the son of Dardanus or Darda, King of Dardania, and Batia, (although some legends say his mother was Olizone). Erichthonius became king of Dardania when his elder brother Ilus died childless. Homer called him "the richest man on earth", because he inherited kingdoms from both his father and his mother's father.

His son and heir by Astyoche or Callirhoe was Tros, the eponym of the Trojans and the Troad.

He is the eponym of Troy, also named Ilion for his son Ilus. Tros's wife was said to be Callirrhoe, daughter of the River God Simois, or Acallaris, daughter of Eumedes.

When Zeus abducted Ganymedes, Tros grieved for his son. Sympathetic, Zeus sent Hermes with two horses so swift they could run over water. Hermes also assured Tros that Ganymede was immortal and would be the cupbearer for the gods, a position of much distinction.

**the land of Troy**, ancient district formed mainly by the northwestern projection of Asia Minor (modern Turkey) into the Aegean Sea. It extended from the Gulf of Edremit (ancient Adramyttion) on the south to the Sea of Marmara and the Dardanelles on the north and from the Ida mountain range and its northerly foothills on the east to the Aegean on the west. In the southeast corner is Mount Ida (modern Kaz Mountain), which rises to a height of 5,820 feet (1,774 m). The eastern and southern regions are rugged and partly wooded. The Scamander (Küçük Menderes) River, fed from springs on the Ida mountains, has cut its way through the hills to the plain in the northwest and empties into the Hellespont just before the Hellespont flows into the Aegean.

### **Ilus (son of Tros)**

Ilus (Ilos in Greek) is in Greek mythology the founder of the city called Ilion (Latinized as Ilium) to which he gave his name. When the latter became the chief city of the Trojan people it was also often called Troy, the name by which it is best known today.

**Ilus was son and heir to Tros of Dardania** and brother of Assaracus and Ganymede. He won the wrestling prize at games held by the King of Phrygia and received fifty youths and maidens as his reward. The king also, on the advice of an oracle, gave him a cow and asked him to found a city where it should lie down. Ilus did so.

Ilus then prayed to Zeus for a sign and at once saw the Palladium fallen from heaven and lying before his tent but was immediately blinded for the impiety of looking on the image. He regained his sight after making offerings to Athena.

Ilus preferred his new city of Ilium to Dardania and on his father's death he remained there, bestowing the rule of Dardania on his brother Assaracus instead and so the Trojans were split into two kingdoms.

**Ilus was father of Laomedon** who succeeded him. His wife was said to be either Eurydice (daughter of Adrastus), or Leucippe. Other children of Ilus include two daughters, Themiste (or Themis) and Telecleia, who married Capys and Cisseus, respectively.

Ilus Ilyus King of TROY and Eurydice Eurydike Ilium of Troy had the following children:

#### **Laomedon**

From Wikipedia, the free encyclopedia

Heracles about to kill Laomedon, terra sigillata flask from Southern Gaul, late 1st century-early 2nd century CE  
In Greek mythology, Laomedon (Ἰλαμένης) was a Trojan king, son of Ilus, brother of Ganymedes and father of Priam, Astyoche, Lampus, Hicetaon, Clytius, Cilla, Proclia, Aethilla, Clytadora, and Hesione. Tithonus is also described by most sources as Laomedon's eldest legitimate son; and most sources omit Ganymedes from the list of Laomedon's children, but indicate him as his uncle instead. Laomedon's two wives are Strymo (or Rhoeo) and Leucippe; by the former he begot Tithonus and by the latter King Priam (see John Tzetzes' Scholia in Lycophronem 18

(«? μ?? ??? ???αμ?? ?? ?e???pp??, ? d? ??????? ?????? ? St??μ??? t?? S?αμ??d??? ???at??? ?????»)). He also had a son named Bucolion by the nymph Abarbarea, as recounted by Homer in the Iliad (6.22).

Laomedon owned several horses with divine parentage, with whom Anchises secretly bred his own mares.

According to one story, Laomedon's son, Ganymedes, was kidnapped by Zeus, who had fallen in love with the beautiful boy. Laomedon grieved for his son. Sympathetic, Zeus sent Hermes with two horses so swift they could run over water. Hermes also assured Laomedon that Ganymedes was immortal and would be the cupbearer for the gods, a position of much distinction. However, Ganymedes is more usually described as a son of Tros, an earlier King of Troy and grandfather of Laomedon. Laomedon himself was son of Ilus, son of Tros.

Poseidon and Apollo, having offended Zeus, were sent to serve King Laomedon. He had them build huge walls around the city and promised to reward them well, a promise he then refused to fulfill. In vengeance, before the Trojan War, Poseidon sent a sea monster to attack Troy.

Laomedon planned on sacrificing his daughter Hesione to Poseidon in the hope of appeasing him. Heracles (along with Oicles and Telamon) rescued her at the last minute and killed the monster. Laomedon had promised them the magic horses as a reward for their deeds, but when he broke his word, Heracles and his allies took vengeance by putting Troy to siege, killing Laomedon and all his sons save Podarces, who saved his own life by giving Heracles a golden veil Hesione had made (and therefore was afterwards called Priam, from priamai 'to buy'). Telamon took Hesione as a war prize and married her; they had a son, Teucer.

Another Version of the Story:

Laomedon, in Greek mythology, king of Troy. When Laomedon failed to pay Poseidon, Apollo, and King Aeacus for building the walls of Troy, Poseidon sent a sea monster to ravage the land. Total catastrophe could be averted only by the sacrifice of Laomedon's daughter, Hesione. Laomedon offered Hercules a pair of immortal horses if he would rescue his daughter. Hercules slew the sea monster and saved Hesione but Laomedon refused to give him the horses. In revenge, Hercules sacked Troy and killed Laomedon and all his sons except Priam, who became the new king of Troy.

Laomedon Troy and Strymo Placia Troy had the following child:

**31. Priam King of Troy, died 1183 B.C., married Hecuba. Children were: Troan, Alexander "Paris", Helenus, Creusa, Laodice, Polyxena, Cassandra, Deiphobus, Hector, Pammon, Polites, Antphus, Hipponous, Polydorus, and Troilus. Priam married second to Arisbe. Child by second marriage: Aesacus**

32. Troan Queen of Troy married Munon (Memnon). Child: Tror (Thor)

**Priam** had a number of wives; his first was Arisbe, who had given birth to his son Aesacus, who met his death before the advent of the Trojan War. Priam later divorced her in favor of Hecuba (or Hecebe), daughter of the Phrygian king Dymas. By his various wives and concubines Priam was the father of fifty sons and nineteen daughters. Hector was Priam's eldest son by Hecuba, and heir to the Trojan throne. Paris, another son, was the cause of the Trojan War. Other children of Priam and Hecuba include the prophetic Helenus and Cassandra; eldest daughter Ilione; Deiphobus; Troilus; Polites; Creusa, wife of Aeneas; Laodice, wife of Helicaon; Polyxena, who was slaughtered on the grave of Achilles; and Polydorus, his youngest son.

**Priam was originally called Podarces** and he kept himself from being killed by Heracles by giving him a golden veil embroidered by his sister, Hesione. After this, Podarces changed his name to Priam. This is an etymology based on priatos "ransomed"; the actual etymology of the name is probably not Greek, but perhaps Lydian in origin.

When Hector is killed by Achilles, Achilles treats the body with disrespect and refuses to give it back. Zeus sends the god Hermes to escort King Priam, Hector's father and the ruler of Troy, into the Greek camp. Priam tearfully pleads with Achilles to take pity on a father bereft of his son and return Hector's body. He invokes the memory of Achilles' own father, Peleus. Priam begs Achilles to pity him, saying "I have endured what no one on earth has ever done before - I put my lips to the hands of the man who killed my son".[2] Deeply moved, Achilles finally relents and returns Hector's corpse to the Trojans. Both sides agree to a temporary truce, and Hector receives a hero's funeral. Achilles further goes on to give Priam leave to hold a proper funeral for Hector complete with funeral games. He promises that no Greek will engage in combat for 11 days, but on the 12th day of peace, the mighty war between the Greeks and the Trojans would resume. Priam is killed during the Sack of Troy by Neoptolemus (or Pyrrhus) son of Achilles. His death is graphically related in Book II of Virgil's Aeneid. In Virgil's description Neoptolemus first kills Priam's son Polites as he seeks sanctuary on the altar of Zeus. Priam rebukes Neoptolemus, throwing a spear at him, which misses. Neoptolemus then drags Priam to the altar and there kills him too.

It has been suggested by Hittite sources, specifically the Manapa-Tarhunta letter that there is historical basis for the archetype of King Priam. The letter describes one Piyama-Radu as a troublesome rebel who overthrew a Hittite client king and thereafter established his own rule over the city of Troy (mentioned as Wilusa in Hittite). There is also mention of an Alaksandu, suggested to be Paris Alexander (King Priam's son from the Iliad), a later ruler of the city of Wilusa who established peace between Wilusa and Hatti (see the Alaksandu treaty).

Priam Podarces (High King) of Troy and Hecuba of Phrygia had the following child:

**Herodotus also mentions a royal tribe or clan, an elite which dominated the other Scythians:**

Then on the other side of the Gerros we have those parts which are called the "Royal" lands and those Scythians who are the bravest and most numerous and who esteem the other Scythians their slaves.[23]

The elder brothers then, acknowledging the significance of this thing, delivered the whole of the kingly power to the youngest. From Lixopais, they say, are descended those Scythians who are called the race of the Auchatai; from the middle brother Arpoxais those who are called Catiaroi and Trasprians, and from the youngest of them the "Royal" tribe, who are called Paralatai: and the whole together are called, they say, Scolotoi, after the name of their king; but the Hellenes gave them the name of Scythians. Thus the Scythians say they were produced; and from the time of their origin, that is to say from the first king Targitaos, to the passing over of Dareios [the Persian Emperor Darius I] against them [512 BCE], they say that there is a period of a thousand years and no more.[24]

This royal clan is also named in other classical sources the "Royal Dahae". The rich burials of Scythian kings in (kurgans) is independent evidence for the existence of this powerful royal elite.

Although scholars have traditionally treated the three tribes as geographically distinct, Georges Dumézil interpreted the divine gifts as the symbols of social occupations, illustrating his trifunctional vision of early Indo-European societies: the plough and yoke symbolised the farmers, the axe - the warriors, the bowl - the priests. [25] According to Dumézil, "the fruitless attempts of Arpoxais and Lipoxais, in contrast to the success of Colaxais, may explain why the highest strata was not that of farmers or magicians, but rather that of warriors." [26]

Ruled by small numbers of closely-allied élites, Scythians had a reputation for their archers, and many gained employment as mercenaries. Scythian élites had kurgan tombs: high barrows heaped over chamber-tombs of larch-wood - a deciduous conifer that may have had special significance as a tree of life-renewal, for it stands bare in winter. Burials at Pazyryk in the Altay Mountains have included some spectacularly preserved Scythians of the "Pazyryk culture" - including the Ice Maiden of the 5th century BC.

**Scythian women dressed in much the same fashion as men**, and at times fought alongside them in battle. A Pazyryk burial found in the 1990s contained the skeletons of a man and a woman, each with weapons, arrowheads, and an axe. In the 1998 NOVA documentary "Ice Mummies", an archaeologist explains that, "The woman was dressed

exactly like a man. This shows that certain women, probably young and unmarried, could be warriors, literally Amazons. It didn't offend the principles of nomadic society." Anthropologist Hermann Baumann recorded male-to-female transsexual priestesses among the Scythians as well, pointing to a broad range of gender expression in the culture.[27]

As far as we know, the Scythians had no writing system. Until recent archaeological developments, most of our information about them came from the Greeks. The Ziwiyé hoard, a treasure of gold and silver metalwork and ivory found near the town of Sakiz south of Lake Urmia and dated to between 680 and 625 BCE, includes objects with Scythian "animal style" features. One silver dish from this find bears some inscriptions, as yet undeciphered and so possibly representing a form of Scythian writing.

**Homer called the Scythians**"the mare-milkers". Herodotus described them in detail: their costume consisted of padded and quilted leather trousers tucked into boots, and open tunics. They rode with no stirrups or saddles, just saddle-cloths. Herodotus reports that Scythians used cannabis, both to weave their clothing and to cleanse themselves in its smoke (Hist. 4.73-75); archaeology has confirmed the use of cannabis in funeral rituals. The Scythian philosopher Anacharsis visited Athens in the 6th century BCE and became a legendary sage.

**Herodotus wrote**about an enormous city, Gelonus, in the northern part of Scythia (4.108):

"The Budini are a large and powerful nation: they have all deep blue eyes, and bright red hair. There is a city in their territory, called Gelonus, which is surrounded with a lofty wall, thirty furlongs [????????? ??????? = ca. 5,5 km] each way, built entirely of wood. All the houses in the place and all the temples are of the same material. Here are temples built in honour of the Grecian gods, and adorned after the Greek fashion with images, altars, and shrines, all in wood. There is even a festival, held every third year in honour of Bacchus, at which the natives fall into the Bacchic fury. For the fact is that the Geloni were anciently Greeks, who, being driven out of the factories along the coast, fled to the Budini and took up their abode with them. They still speak a language half Greek, half Scythian." (transl. Rawlinson)

Herodotus and other classical historians listed quite a number of tribes who lived near the Scythians, and presumably shared the same general milieu and nomadic steppe culture, often called "Scythian culture", even though scholars may have difficulties in determining their exact relationship to the "linguistic Scythians". A partial list of these tribes includes the Agathyrsi, Geloni, Budini, and Neuri.

### **Herodotus presented four different versions of Scythian origins:**

- 1.Firstly (4.7), the Scythians' legend about themselves, which portrays the first Scythian king, Targitaus, as the child of the sky-god and of a daughter of the Dnieper. Targitaus allegedly lived a thousand years before the failed Persian invasion of Scythia, or around 1500 BCE. He had three sons, before whom fell from the sky a set of four golden implements - a plough, a yoke, a cup and a battle-axe. Only the youngest son succeeded in touching the golden implements without them bursting with fire, and this son's descendants, called by Herodotus the "Royal Scythians", continued to guard them.
- 1.Secondly (4.8), a legend told by the Pontic Greeks featuring Scythes, the first king of the Scythians, as a child of Hercules and a monster.
- 1.Thirdly (4.11), in the version which Herodotus said he believed most, the Scythians came from a more southern part of Central Asia, until a war with the Massagetae (a powerful tribe of steppe nomads who lived just northeast of Persia) forced them westward.
- 1.Finally (4.13), a legend which Herodotus attributed to the Greek bard Aristeas,

who claimed to have got himself into such a Bacchanalian fury that he ran all the way northeast across Scythia and further. According to this, the Scythians originally lived south of the Rhipaeen mountains, until they got into a conflict with a tribe called the Issedones, pressed in their turn by the Cyclopes; and so the Scythians decided to migrate westwards.

Persians and other peoples in Asia referred to the Scythians living in Asia as Sakas. Herodotus describes them as Scythians, although they figure under a different name: "The Sacae, or Scyths, were clad in trousers, and had on their heads tall stiff caps rising to a point. They bore the bow of their country and the dagger; besides which they carried the battle-axe, or sagaris. They were in truth Amyrgian (Western) Scythians, but the Persians called them Sacae, since that is the name which they gave to all Scythians." (Herodotus 4.64)

Notes for Charles Martel:

**Mayor of the Palace of Austrasia Charles Martel** - was born about 0676, lived in Heristal,Liege,Belgium and died on 22 Oct 0741 in Quierzy,Aisne,France . He was the son of Mayor Pepin "The Younger" D'Heristal and Concubine Aupais Heristal Alpaide.

Mayor of the Palace of Austrasia Charles married Swanhilde Carolingian. .

Then Mayor of the Palace of Austrasia Charles married Duchess Rotrude of Austrasia. Duchess Rotrude was born about 0690 in Moselle, Austrasia, France. She was the daughter of Bishop Leutwinus of Treves. She died in 0724 .

Mayor of the Palace of Austrasia Charles - became Mayor of the Palace of Austrasia when his father, Pepin II, died in 714. That year he was imprisoned by his step-mother Plectudis, but escaped later in the year to lead the Austrasian and Neustrian nobles. The next year, the new King Chilperic II refused to act as a puppet to the nobles, and was backed by the Aquitaine duke Eudo, who was by then semi-independent from Frankish sovergnty. In 719, Charles defeated Eudo and took Chilperic hostage. Eudo's terms for mercy were that Chilperic would be recognized as sole ruler of the Franks, and the Charles would control all royal offices (i.e. as Mayor). Eudo had no other choice but to accept. In 720, Chilperic II died, Theuderic IV became king, Charles was stripped of his positions, Eudo was able to attain full independence, and Charles was preoccupied with pushing back Saxon invaders across the Rhine.

CHARLES MARTEL (688?-741). In 732 Charles Martel and his barbarian Frankish army fought a battle near Tours, France, that affected the history of Europe. Their foes were inspired Muslim, or Saracen, troops who were bent on world conquest for the religion of Islam. In a hundred years the Saracens had established a vast empire that stretched from Persia (now Iran) westward across northern Africa. They had gained a foothold in Europe by taking Spain. As they advanced into the region that is now France, the fate of Christian Europe hung in the balance. Charles met the Muslim forces between Poitiers and Tours. In a fierce and bloody battle the Muslims were defeated and their leader killed. In later campaigns Charles drove them back into Spain. His vigorous blows earned him the nickname Martel, from a French word meaning "hammer." This forceful leader never became king of the Franks. As mayor of the palace under ineffectual Merovingian kings, however, he was the true ruler. He increased the influence of the Frankish kingdom in wars against the Alemanni, Bavarians, and Saxons. These and other Germanic tribes had overrun Europe when the Roman Empire crumbled. Only the Franks established a permanent kingdom. Charles aided St. Boniface and other missionaries in spreading Christianity and civilization among the barbarians. He strengthened the hold of the kingdom over the powerful nobles and bishops who sought to set up independent rule in their districts. He distributed land to his nobles to gain their loyalty and service as warriors. Charles prepared the way for his son, Pepin the Short, to gain the Frankish throne. Together they laid the foundation for the reign of Pepin's son Charlemagne. Children with Swanhilde Carolingian (Quick Family Chart)

King Pepin married Countess Bertha "Greatfoot" of Laon about 0740. Countess Bertha was born in 0720 in Laon, Austrasia. She was the daughter of Count Claribert I of Laon and Countess Bertrada of Laon. She died on 12 Jul 0783 in Choisy, Bourgogne, France .

King Pepin - -when his father died in 741, Pepin III and his brother Carloman succeeded as joint Mayors of the Palace of Austrasia. In 746, Carloman abdicated and became a monk, leaving Pepin to rule all of Austrasia on his own.

In 750, Pepin received papal permission from Pope Zachary to take the Frankish crown from King Childeric III. In 751, Zachary formerly deposed Childeric, and Pepin became the first Carolingian king of the Franks. In 753, Pope Stephen went to Gaul to affirm Pepin's crown. In 755, on Stephen's wishes, Pepin attacked the Lombards of Italy who were harrasing the Roman See, and peace was made. The next year, the Lombard king again marauded near Rome, was again defeated, and again made peace with Pepin. That year, Pepin promised the Church Frankish protection, thus breaking ties with the Eastern Empire that were only needed for Italian safety. In 760, Pepin and Duke Waifar of independent Aquitaine started a war which lasted many years.

In 764, both sides were tired, and the war took a one year break. Pepin launched a final campaign against Aquitaine in 766 with full force, Aquitaine was defeated, and Waifar and his family were executed. By 768, the year Pepin died, Aquitaine had been completely conquered.

Notes for Charlemagne Emperor The Holy Roman Empire:

**CHARLEMAGNE** (742?-814). "By the sword and the cross," Charlemagne (Charles the Great) became master of Western Europe. It was falling into decay when Charlemagne became joint king of the Franks in 768. Except in the monasteries, people had all but forgotten education and the arts. Boldly Charlemagne conquered barbarians and kings alike. By restoring the roots of learning and order, he preserved many political rights and revived culture. Charlemagne's grandfather was Charles Martel, the warrior who crushed the Saracens. Charlemagne was the elder son of Bertrade ("Bertha Greatfoot") and Pepin the Short, first "mayor of the palace" to become king of the Franks. Although schools had almost disappeared in the 8th century, historians believe that Bertrade gave young Charles some education and that he learned to read. His devotion to the church motivated him throughout life. Charlemagne was tall, powerful, and tireless. His secretary, Eginhard, wrote that Charlemagne had fair hair and a "face laughing and merry . . . his appearance was always stately and dignified." He had a ready wit, but could be stern. His tastes were simple and moderate. He delighted in hunting, riding, and swimming. He wore the Frankish dress--linen shirt and breeches, a silk-fringed

tunic, hose wrapped with bands, and, in winter, a tight coat of otter or marten skins. Over all these garments "he flung a blue cloak, and he always had a sword girt about him." Charlemagne's character was contradictory. In an age when the usual penalty for defeat was death, Charlemagne several times spared the lives of his defeated foes; yet in 782 at Verden, after a Saxon uprising, he ordered 4,500 Saxons beheaded. He compelled the clergy and nobles to reform, but he divorced two of his four wives without any cause. He forced kings and princes to kneel at his feet, yet his mother and his two favorite wives often overruled him in his own household. Charlemagne Begins His Reign

Charlemagne was determined to strengthen his realm and to bring order to Europe. In 772 he launched a 30-year campaign that conquered and Christianized the powerful pagan Saxons in the north. He subdued the Avars, a huge Tatar tribe on the Danube. He compelled the rebellious Bavarian dukes to submit to him.

When possible he preferred to settle matters peacefully, however. For example, Charlemagne offered to pay the Lombard king Desiderius for return of lands to the pope, but, when Desiderius refused, Charlemagne seized his kingdom in 773 to 774 and restored the Papal States.

The key to Charlemagne's amazing conquests was his ability to organize. During his reign he sent out more than 50 military expeditions. He rode as commander at the head of at least half of them. He moved his armies over wide reaches of country with unbelievable speed, but every move was planned in advance. Before a campaign he told the counts, princes, and bishops throughout his realm how many men they should bring, what arms they were to carry, and even what to load in the supply wagons. These feats of organization and the swift marches later led Napoleon to study his tactics.

One of Charlemagne's minor campaigns has become the most famous. In 778 he led his army into Spain, where they laid siege to Saragossa. They failed to take the city, and during their retreat a group of Basques ambushed the rear guard at Roncesvalles and killed "Count Roland." Roland became a great hero of medieval songs and romances.

By 800 Charlemagne was the undisputed ruler of Western Europe. His vast realm covered what are now France, Switzerland, Belgium, and the Netherlands. It included half of present-day Italy and Germany, part of Austria, and the Spanish March ("border"). The broad March reached to the Ebro River. By thus establishing a central government over Western Europe, Charlemagne restored much of the unity of the old Roman Empire and paved the way for the development of modern Europe. Crowned Emperor

On Christmas Day in 800, while Charlemagne knelt in prayer in St. Peter's in Rome, Pope Leo III seized a golden crown from the altar and placed it on the bowed head of the king. The throng in the church shouted, "To Charles the August, crowned by God, great and pacific emperor, long life and victory!"

Charlemagne is said to have been surprised by the coronation, declaring that he would not have come into the church had he known the pope's plan. However, some historians say the pope would not have dared to act without Charlemagne's knowledge.

The coronation was the foundation of the Holy Roman Empire. Though Charlemagne did not use the title, he is considered the first Holy Roman emperor (see Holy Roman Empire). Reform and Renaissance Charlemagne had deep sympathy for the peasants and believed that government should be for the benefit of the governed. When he came to the throne, various local governors, called "counts," had become lax and oppressive. To reform them, he expanded the work of investigators, called *missi dominici*. He prescribed their duties in documents called capitularies and sent them out in teams of two--a churchman and a noble. They rode to all parts of the realm, inspecting government, administering justice, and reawakening all citizens to their civil and religious duties.

Twice a year Charlemagne summoned the chief men of the empire to discuss its affairs. In all problems he was the final arbiter, even in church issues, and he largely unified church and state.

Charlemagne was a tireless reformer who tried to improve his people's lot in many ways. He set up money standards to encourage commerce, tried to build a Rhine-Danube canal, and urged better farming methods. He especially worked to spread education and Christianity in every class of people.

He revived the Palace School at Aachen, his capital. He set up other schools, opening them to peasant boys as well as nobles.

Charlemagne never stopped studying. He brought an English monk, Alcuin, and other scholars to his court. He learned to read Latin and some Greek but apparently did not master writing. At meals, instead of having jesters perform, he listened to men reading from learned works.

To revive church music, Charlemagne had monks sent from Rome to train his Frankish singers. To restore some appreciation of art, he brought valuable pieces from Italy. An impressive monument to his religious devotion is the cathedral at Aachen, which he built and where he was buried.

At Charlemagne's death in 814 only one of his three sons, Louis, was living. Louis's weak rule brought on the rise of civil wars and revolts. After his death his three quarreling sons split the empire between them by the Partition of Verdun in 843.
